

## Part-Time Job Experience

Working my first part-time job in a retail store introduced me to responsibilities I had not previously encountered. I initially viewed the job as a way to earn money, but it quickly became a lesson in professionalism and accountability.

During my first month, I struggled with time management. Balancing work shifts, university assignments, and personal commitments felt overwhelming. On one occasion, I arrived late for my shift because I underestimated travel time. My supervisor addressed the issue calmly but firmly, emphasizing the importance of reliability.

That conversation forced me to reflect on my priorities. I realized that professionalism extends beyond performing assigned tasks; it includes punctuality, communication, and respect for others' time. I began organizing my schedule more carefully, preparing for shifts in advance, and communicating proactively if conflicts arose.

Over time, I became more confident in handling customers and resolving complaints. The job strengthened my interpersonal skills and taught me to remain composed under pressure. Looking back, the experience shaped my work ethic and prepared me for future professional environments.
